PROCESS SYSTEMS - OTC INDUSTRIAL

FUREY FILTER & PUMP

We help customers design, engineer and build turnkey process system solutions. Skid Packages, Booster Pump, Chemical Feed, Petroleum Pipeline and Refinery.

A LEADER IN PROCESS INSTRUMENTATION

Since 1988, we've helped engineers and plant managers squeeze every ounce of productivity out of their flow, level, pressure and temperature instrumentation, making their job easier, saving them money, and – perhaps most important – delivering peace of mind.

Control Plus offers precisely what you need - from the #1 brand to the lesser known, niche, or specialty products, and everything in between. Across the board, our products are accurate and durable.

Supplying high-quality instrumentation is only part of our goal. Equally important is our commitment to take care of our customers, no matter the need or size of the order.
